Green Banking and Sustainability: Concepts

Now a days, there is a shift from the traditional development to sustainable development and environmental protection. The emphasis is on Reduce, Reuse and Recycle. Throughout the world the organizations are concerned about the impact of depletion of environment. Banks and financial institutions are also playing an important role in reducing the carbon footprints. The leadership has an important role to play in building green and ethical economy.

The aim of this national seminar is to bring together the Industry and banking professionals, economists, policy makers, academicians, researchers and scholars to discuss the issues in green and ethical economy. The focus will be on how industry, banking, political leadership and academicians can contribute towards green and ethical economy.

Who Can Participate In The Seminar?

The National seminar is open to practitioners, academicians, research scholars, post graduate students and policymakers who are engaged directly or indirectly with the field of Management, Economics and Finance.

The following types of contributions are invited from the interested participants:

Papers: Conceptual/review and empirical papers based on research, practice Management

Cases: Management/decision Cases based on real life decision dilemma and Case Studies on relevant areas.
